

ANNUAL REPORT
ON THE
(AC)
WORKING
OF THE
MAYO COLLEGE,
AJMER.
FOR
1936-37.

Annual Report on the Working of the Mayo College, Ajmer, for 1936-37.

1. **Management.**—The General Council held two meetings during the year under report *viz.* on 28th November 1936 and 20th April 1937. At the first meeting His Highness the Maharaja of Jodhpur and His Highness the Maharaja of Jaipur were unanimously re-elected President and Vice-President respectively of the Council for the coming year with effect from August 26th, 1937.

General Council.

The meeting also decided to widen the membership of the Council, by increasing the number of Ruling Princes outside Rajputana who are eligible for co-option under rule I (IV) from 4 to 6 and the representatives of the Old Boys' Association from 3 to 4.

At the same meeting in accordance with the constitution His Highness the Maharaj Rana of Dholpur, His Highness the Maharaja of Jaipur, His Highness the Maharawat of Partabgarh, and His Highness the Maharawal of Dungarpur were elected members of the Working Committee for the next 3 years with effect from 26th August 1937.

The Principal was re-appointed Secretary of the Council and of the Working Committee for 4 years with effect from August 26th 1937.

The working Committee met twice, on 3rd October 1936 and on 20th March 1937. At the latter meeting His Highness the Maharaj Rana of Dholpur was unanimously re-elected Chairman of the Committee for the next three years.

Working Committee.

On the recommendation of the Committee accepted by the General Council at their second meeting the membership of the Committee in future will consist of one more Ruling Prince of Rajputana and one more representative of the Old Boys' Association making a total membership of 8, but the quorum necessary for meetings will remain at the former figure of 4. This new arrangement should make it easier to obtain a quorum for meetings and so obviate the inconvenience occasioned in recent years by the postponement or cancellation of meetings.

In accordance with the above the Maharana of Danta was elected a member of the Committee for the next 3 years with effect from August 26th 1937, and Raj Chandra Sen of Kunadi and Rao Bahadur Thakur Onkar Singh of Bagnuri were elected to the Committee as representatives of the Old Boys' Association.

Extracts from the proceedings of the Council and Committee meetings, other than those mentioned in the main body of the report will be found in Appendix A.

2. Finance.—Details of Receipts and Expenditure of the various funds are given in Appendix B. The following is a condensed statement:—

	Rs.	Rs.
Total income		2,28,300
<i>Deduct</i> —Abnormal non-recurring receipts ...		35,787
		<hr/>
Normal income		1,92,513
<i>Add</i> —Normal income not realized:—		
Cut in Government grant	4,950	
Arrears of fees for 1936-37	4,000	8,950
		<hr/>
Nett normal income		2,01,463
Total expenditure	2,40,542	
<i>Deduct</i> —Abnormal non-recurring expenditure ...	54,055	
		<hr/>
Nett normal expenditure		1,86,487
		<hr/>
Surplus of nett normal income over nett normal expenditure.		14,976

Renewal of Bikaner
grant for Post
Diploma classes.

In view of the fact that by affiliation to the Agra University the College had attained the status of a Degree College, the Bikaner Durbar were good enough to renew their annual grant of Rs. 4,000/- to the College Post Diploma Section which had been discontinued from 1925 to 1936, and this grant will cover the additional expenditure required on the staff by the change in status of the Post Diploma section.

3. Buildings—The College Public Works Department is now responsible for the maintenance not only of the buildings in the College belonging to the College but also of those belonging to the States and to Government. The last named, being part of the original Endowment Grant by the Government of India on the founding of the College, have been handed over to the College free of rent.

Jaipur House Extension.

In my previous report reference was made to the proposed extension to the Jaipur Boarding House. In the year under report a revised scheme for additions and alterations to be completed by instalments was approved by His Highness and the work will be carried out by the State Public Works Department. The scheme provides for the construction of a new wing facing the west wing of the House and for remodelling the old portion of the House to provide a dining hall, common study room, a dormitory for junior boys, changing rooms, and Motamid's quarters. The new wing is to be taken in hand first and it is hoped that it will be ready for occupation next term. It will afford a most welcome and badly needed relief to the present congestion in the House.

Staff and Old Boys
Club.

At the beginning of the school year a Staff and Old Boys' Club, which, at the instance of the members of the Staff, was named the Stow Club, was started. Premises were provided by the adaptation and extension of the former P. W. D. office and godown near the Main building. The accommodation in the Club comprises a sitting room, a card room, a billiards room, a changing room, an office, and a kitchen. The facilities for outdoor games include 2 tennis courts, a bowling green, and a badminton court. The membership of the club is open to all superior members of the College Staff and to Old Boys

The latter can join either as temporary or as life members. The institution of the Club was made possible by a number of initial donations from Ruling Princes including :—His Highness the Maharana of Udaipur, His Highness the Maharaja of Jodhpur, His Highness the Maharao Raja of Bundi, His Highness the Nawab of Tonk, His Highness the Maharaj Rana of Dholpur, His Highness the Maharawal of Dungarpur, and His Highness the Maharawat of Partabgarh.

The Ruling Chief of Khairgarh E. S. A. an Old Boy of the College, generously presented a Billiards Table and K. Kamakshya Narain Singh of Ramgarh, another Old Boy, gave a Wireless Set.

The permanent membership of the club, which has made a most encouraging start, is at present 60 apart from Patrons and Life members ; and the club forms a welcome bond of union and a common meeting place for all members of the Staff and many Old Boys.

The scheme for providing houses in the College grounds for Indian members of the Staff, to which reference was made in my last report, was approved by the General Council at their meeting of November 1936 and construction is in course of progress. Eight houses are being built and four of them are expected to be ready early next term. In addition to the advantages both to the College and the Masters of a residential staff system the scheme will be a permanent form of investment for the College from the rentals payable.

Indian Staff
Houses.

With the institution of the Staff Club the Staff Common Room was removed from the former P. W. D. office to the adjoining godown part of which was extended and rebuilt for the purposes.

Staff Common
Room.

The Carpentry and Motor Instruction rooms hitherto located in the P.W.D. godown were shifted to the godown adjoining the Bikaner Pavilion which was adapted for the purpose.

4. Roads and Grounds—During the year the hitherto remaining untarred portions of the main roads of the College including those passing the Main building were tarred. Additional grass was planted round the Main building and this together with the planting of shrubs and the laying down of gravel on the north front has appreciably improved the appearance of the building.

During the rains a considerable amount of new hedge planting was done but the growth of hedges has been handicapped by the scanty rainfall.

The plot of land recently acquired on the south side of the College boundary was fenced in, while the land outside the regular boundary immediately surrounding the old Temple being no longer wanted was sold.

Purchase and sale
of land.

During the Summer vacation a pavilion was constructed on the new second XI Cricket ground which had been made on the site of the former Riding ground and called the St. John ground after the first Principal of the College. This ground has been turfed.

St. John Ground.

North of this two new Foot-ball grounds were made, and the College has now 6 Cricket grounds, 3 of which are grass, 4 grass Football grounds, and 4 Hockey grounds.

New Grounds.

Gardens.

During the year a number of House gardens were re-designed and relaid, resulting in a general improvement.

Lady Willingdon Cup.

The Lady Willingdon Cup was won by Udaipur House, Jaipur House being second.

5. **Special Donations.**—It will be seen from the preceding paragraphs that the College has again been fortunate in gifts during the year.

Jodhpur Polo-ground water installation.

The College is also indebted for a number of other donations for special purposes. His Highness the Maharaja of Jodhpur continued his generosity to the College by presenting Rs. 4,000/- for an electric water installation for the College Polo ground. This gift will give the College a first-class grass ground which can be used throughout the year.

Instruction Motor.

His Highness also presented a Morris Car for instructional purposes in place of the Sunbeam car formerly presented by him and now worn out.

Jaipur Temple donation.

His Highness the Maharaja of Jaipur made a donation of Rs. 1,000/- towards the equipment of the new Temple. This gift has enabled the hall of the Temple to be provided with screens in the arches to keep out wind and rain and with suitable durries.

Danta Library donation.

The Maharana of Danta made a donation for the College Section Library which has provided the Library with a number of badly wanted books of reference.

Panna Pavilion.

His Highness the Maharaja of Panna, as a leaving gift in the name of his two sons who left the College in 1936, made a donation for converting the somewhat unsightly stand on the 1st XI Hockey ground into a suitable pavilion.

Boarding House gifts

In addition to the above the Bundi, Bikaner, Alwar, and Tonk Durbars were good enough to make special donations for further improving the Boarding Houses.

The warm thanks of the College are due to the above for their generosity.

6 **Staff—College Section.**—The College section Staff now comprises 5 whole-time lecturers in addition to the Principal, which is the minimum necessary in view of the affiliation of the College Section classes to the Rajputana Intermediate Board and to the Agra University. The work of the regular staff received a valuable supplement from the assistance volunteered by Mr. Waddington.

Retirement of Rai Sahib Pt. Shyam Sunder Sharma.

School Section.—In October Rai Sahib Pt. Shyam Sunder Sharma, Senior Indian Assistant, retired after a long and honourable connection with the College; and Mr. A. Wahid, Second Indian Assistant, was selected by the Working Committee to succeed him as Senior Assistant. The vacancy on the permanent staff occasioned by the retirement of R. S. Pt. Shyam Sunder Sharma was subsequently filled by the confirmation in a junior grade of Mr. A. Sharman M.A., who had been acting as temporary Assistant Master. In view of the increase in the College Roll and the need to form additional classes the Indian staff was temporarily increased by two additional Masters.

Messrs. Bhatia and Kapur, who had been on deputation for training during the previous year, returned to the College from Lahore and England respectively having passed their examinations with credit. On their return the policy of sending junior members of the staff for training was continued by the deputation of Mr. Dan Mal to the Training College at Lahore.

Deputation of
Masters on training.

Thakur Shivrath Singh of Kanota, an Old Boy of the College succeeded Thakur Sawai Singh as Motamid of the Jaipur House in November.

Boarding House Staff.

During the year Mr. C. W. Waddington, C.I.E., M.V.O., returned to the College as Guardian to the Maharaj Kumars of Jodhpur and Major G. S. Jarnman joined the College as Guardian to R. K. Hardayal Singh of Sikar.

English Guardians.

The number of English Guardians is at present 5 and it is again my pleasant duty to express my thanks to them for the assistance they have been good enough to give in the various activities of the College.

7. The College Roll.—During the year the College roll rose from 152 to 159. Admissions numbered 36 of whom 25 came from Rajputana and 11 outside Rajputana. Of the former 11 came from Jaipur state, and 4 from Jodhpur state, the rest being contributed by Bharatpur, Alwar, Kotah, Bikaner and Danta States and Ajmer-Merwara. The admissions from outside Rajputana comprised boys from the Punjab, Central India, The Eastern States Agency, The Western India States Agency, and Bengal.

A distribution list of the College Roll as it stands at present will be found in Appendix E.

8 General Training.—The practice of Holiday tours started in the previous year for students of the College section was continued by a successful tour during the Christmas holidays to Northern India. It was hoped to extend the practice to boys in the School section by arranging tours during the Summer vacation; but the response, largely owing to the season of the year, was not sufficient to justify any tour being undertaken. I much hope to be able to arrange tours of boys of the School section in the next cold weather, which is a more suitable season.

Tours.

An interesting extension of the activities of the College section was the starting of Social service to the poor and a number of students paid visits to villages in the neighbourhood of Ajmer to assist the villagers in any way they could.

Social Service.

In the College Section Debates were included as a regular feature of the class time-table, while in the School section they were held outside the school periods.

Debates.

In the School section the reading habit, I am glad to say, has continued to grow and over 2,000 books were taken out of the School library during the year apart from books taken from Class libraries.

Libraries.

Living as they do in a number of small scattered Boarding Houses, largely composed of boys from the same State, boys in the School section of the College tend to be split up into small self-centred local groups with little opportunity of meeting together apart from school and games. For this reason a few years ago I started Social Intercourse periods on Sundays

Inter-House
Hospitality.

and Holidays at which boys could meet together irrespective of their Houses and for this as well as for other reasons Evening entertainments. The idea has been carried further in the year under report by the encouragement of Inter-House hospitality, boys of one House with the approval of their House Master being allowed to ask boys from other Houses to dinner or to tea and to play games on Sundays and Holidays.

Careers Advisory Bureau.

The problem of finding suitable careers for such Mayo College boys as have to make their own way in the world or have no suitable appointment waiting for them in their homes is increasing in importance with new conditions in India, and arrangements have therefore been made to start a Careers Advisory Bureau which will assist boys to choose a career.

9. **Class Instruction.—College Section.**—In the College Section improvements were made in the Jhalawar House by extending the library and by equipping the lecture rooms according to subjects taught, also by providing all lecture rooms and tutorial rooms with wire-gauze doors.

School Section.—In the School section the class rooms were re-decorated with suitable pictures obtained from England and the facilities for instruction in Geography were increased by a special library in the Geography room and by extending the Open Air Map of India. The junior classes now contain a large number of young boys some of whom are almost at the kindergarten stage. I welcome boys joining at a young age because experience has convinced me that the younger a boy joins the better he does. But these boys require special methods of instruction, and I am inclined to think that it will be advisable to appoint a trained Lady teacher for the junior classes.

School Period.

The number of daily class periods for senior classes remains at 7 periods of 40 minutes each, but in the junior classes in the interests of boys' health and to avoid over-strain they have been curtailed. Junior boys are required to rest for certain periods during the afternoon and most of the junior boys do not have afternoon school at all.

Examinations.

2 Candidates appeared in April for the Intermediate Examination of the Rajputana Board, 8 for the Higher Diploma Examination, and 15 for the Diploma Examination. Of the 8 candidates in the Higher Diploma, 4 passed in second class and 1 in third class while of the 15 candidates in the Diploma, 14 came out successful. Of the 14 successful candidates 8 passed in the second division and 6 in the third division while 10 candidates secured distinctions in Hindi, Science, Administration and Persian. The result of the Intermediate Examination has not yet been received.

Riding.

10. **Physical Training and Games.**—The College Squadron has had a satisfactory year under the leadership of Maharaj Kumar Pramod Singh of Rajpipla, who has done very good work, and his departure will leave a gap that will not be easy to fill.

It is a great pity there are no riders from the Bikaner, Kotah, and Tonk Houses.

During the Monsoon term when Col. Howson was on leave general arrangements were under the control of Major Hannay and the sincere thanks of the College are due to him and also to Captain Beatty and Major Jarman for their most ready assistance throughout the year.

Col. Howson has been in charge since his return from leave in October.

A special jumping course for the Junior Division has been constructed. This has done much to raise the standard of the Lower Division.

Dafedar Bhanwar Singh, Jaipur Lancers has done good work throughout the year as Instructor.

The arrival of the Maharajkumars of Jodhpur with Maharaj Hanumant Singh has compensated for the departure of Maharaj Kumar Narendra Singh and Maharaj Kumar Pushpendra Singh of Panna.

Polo.

There are now 15 boys playing regularly in station Polo and 6 others who practise with great enthusiasm on the College ground on Sundays and Holidays. Among these are several who show real promise.

For the first time it has been possible to raise teams from the House Divisions to compete for the Dhonkal Cup. The result of the matches was—

North defeated West by 8 goals to 1. South defeated West by 4 goals to 2. North defeated South by 4 goals to 2.

An innovation during the year was the institution of a triangular contest at all games between the Staff, the College section, and the School section. The Staff won both their matches at Cricket and Tennis, the College section were similarly successful at Squash, the School section had an easy victory in the Sports, and a close win in the Swimming, while the Football resulted in honours easy.

Triangular Contest.

The College Cricket XI again won the Colvin Shield for the third year in succession defeating the Tonk XI in the final after a close game. In the Inter-Provincial Championship for the Ranji Trophy the College was well represented in the Rajputana team, which played against and was beaten by Central India after securing a substantial lead in the first innings, supplying 4 of the XI.

Cricket-Colvin Shield.

The Annual Tournament of the School section teams with the Daly College for the Kishangarh Shield was due this year to be played at Ajmer in February, but it had, I regret, first to be postponed and then cancelled owing to an outbreak of mumps at the College, which though limited to a few cases was persistent.

Tournament with the Daly College.

The Annual Inter-House Athletic Sports held in March produced a crop of records. Kanwar Hari Sen of Pisangan beat the previous record for the Long Jump with a jump of 20 ft. 7½ inches, and that of the 100 yards by returning a time of 10 seconds, and equalled the 120 yards Hurdles record of 15½ seconds and his own record of the previous year of 5 ft. 6 inches for the High Jump, while Thakur Manohar Singh of Dhamli (Jodhpur) beat the Half Mile record with a time of 2 mts. 15 seconds.

School Athletics Sports.

11. Important events.—The Annual Prize-Giving and Old Boys' Gathering, a full account of which appeared in the December issue of the Mayo College Magazine, took place on November 28th, 1936. The President of the General Council of the College, His Highness the Maharaja of Jodhpur, presided at the Prize-Giving which was attended by 4 other Ruling Princes and there was a satisfactory attendance of other Old Boys.

Prize-Giving and Old Boys' Gathering.

Inspection.

In accordance with the new system introduced by the Government of India two years ago the College was this year inspected from the point of view of class instruction by two educational experts Messrs: F. K. Clark, M.A., I.E.S. and W. G. P. Wall, M. Sc., I.E.S., Principal Spence Training College, Jubbulpore and Principal Training College, Allahabad, respectively while Lt. Col. G. L. Betham, C. I. E., M. C., Resident in Mewar and Political Agent Southern Rajputana States, was associated with the inspection from the general and political point of view.

Their reports will be found in Appendix F.

Honours.

12. Honours.—During the year the following honours were gained by Old Boys:—

G. C. S. I His Highness the Maharaja of Jodhpur.

His Highness the Maharaja of Orchha.

Knighthood.

The Maharajkumar of Vizianagram.

Maharaja (Hereditary)

His Highness Raja Sir Narendra Shah, K.C.S.I., Raja of Tehri-Garhwal.

Obituary.

13. Obituary.—I deeply regret to announce the deaths of the following Old Boys:—

Rao Bahadur Col. Thakur Prithi Singh of Bera, Marwar (1904-1913.)

Rawat Mangal Singh of Piploda, C. I. (1906-1913.)

Kanwar Laxman Singh of Rupaheli, Mewar (1893-1900.)

Thakur Laxman Singh of Mokhampura, Kushalgarh (1907-1915.)

Thakur Bhawani Singh of Renwal, Jaipur (1923-1929.)

Thakur Sajjan Singh of Junia, Ajmer-Merwara (1921-1925.)

Maharaj Fateh Singh C.S.I., of Raoti, Marwar (1877-79.)

Baksbi Girdhar Singh of Paneori, Bharatpur (1908-1916.)

Conclusions.

14. Conclusion. - In conclusion it is my pleasant duty to acknowledge the unwearying assistance which I have received from the Vice-Principal, Col. Howson, and other members of the staff.

I also wish to express the great indebtedness of the College and myself to the President and Vice-President of the General Council and the Chairman and members of the Working Committee for the unfailing and generous support which they have extended to its interests.

Ajmer, May 1937.

V. A. S. STOW,

Principal.

LIST OF APPENDICES.

A.—Extracts from the proceedings of the meetings of the General Council and the Working Committee.

B.—Receipts and Expenditure 1936-37.

C.—College Staff on the 30th April 1937.

D.—Admissions and Withdrawals 1936-37.

E.—Distribution List of the College Roll as it stood on 30th April 1937.

F.—Inspection Reports for 1937.

G.—Officers and Prize and Cup Winners 1936-37.

students of the College Section from outside Rajputana, and that the Principal formulate definite proposals and circulate them to members of the Council and to the Hon'ble the Visitor for their previous consideration before the next meeting and for discussion at the next meeting.

Extracts from the Proceedings of the meeting of the Working Committee of the Mayo College held at the Mayo College on the 3rd October 1936.

4. The committee considered the question of the appointment of a new Vice-Principal in place of Lt. Col. G. Howson, C. I. E., M. C., due to retire from the service of the College in April 1937, and resolved that (a) Col. Howson be offered an extension of one year from the date of the expiry of his contract with the College on the 30th April 1937, (b) the Principal be deputed to look for a suitable successor to Col. Howson in England during the summer vacation of 1937, (c) Mr. Stow be asked to continue as Principal of the College for 4 years after the date due for his retirement from Government service in 1938.

14. With reference to Resolution No. 6 (b) of the meeting of the Working Committee dated the 7th December 1935, the Committee considered the question of the maintenance costs of the New Temple and resolved that:—

(a) The following staff be sanctioned for the New Temple:—

Pujari	Rs. 20/- p. m.
Assistant Pujari and Cook	Rs. 15/- p. m.
Chowkidar	Rs. 10/- p. m.
Mali	Rs. 12/- p. m.
Walterman-Farrash	Rs. 10/- p. m.
Washerman (allowance to a College servant)					Rs. 2/- p. m.
Sweeper	—do—			...	Rs. 1/- p. m.

(b) The balance of the contributions received on the occasion of the consecration ceremony be spent in providing shutters in the Hall.

15. With reference to Resolution No. 11 of the 7th December 1935, regarding members of the Indian staff holding the status of Government servants, the Committee further considered the question and subsequent correspondence on the subject, and noted that the final orders of Government of India were awaited.

Extracts from the Proceedings of the meeting of the Working Committee of the Mayo College held at the Mayo College on the 20th March 1937.

(5) The Committee considered the question of the lease of College land at present leased for cultivation North of the Alwar Gate to the Municipal Committee, Ajmer, for Municipal playing fields, and resolved that the

Committee have no objection in principle to the proposal but that detailed proposals from the Municipal authorities be awaited.

12. The Committee considered the question of the award of Maharaja Hari Singh Scholarship for the second half of the year 1936-37 and for the year 1937-38, and resolved that subject to the approval of His Highness the Maharaja of Kashmir, (a) the Scholarship be re-awarded to Kanwar Gajendra Singh of Kunadi, studying at Cambridge University, for the 2nd half of the year 1936-37 with effect from 1st October 1936, and (b) on the recommendation of the Principal the Scholarship be awarded to Thakur Shyam Karan of Seora for one year in the first instance with effect from 1st September 1937.

With the approval of the Committee Raj Chandra Sen withdrew while the matter was under discussion.

APPENDIX F, INSPECTION REPORT 1937.

We inspected this College on February 25th, 26th and 27th, which was a half holiday.

We were concerned chiefly with the organization and teaching work done in the school section of the institution. We visited also, however, the Intermediate Classes which have been recently recognised by the Board of High School and Intermediate Education for Rajputana, Central India and Gwalior. The College is also affiliated to the Agra University for the B.A. degree. Lt. Col. G. L. Betham, C. I. E., M. C., in his capacity as political officer, was associated with the inspection. We would like to express our thanks to Mr. V. A. S. Stow, C. I. E., the Principal and the staff for the willing help given to us during our visit.

Buildings.

It is a pleasure to go over the extensive grounds of the college which have been well laid out and are beautifully kept. The class rooms are well furnished and suitable in size for present numbers. A pleasing feature we noted was the number of good pictures about the place. Throughout there is an atmosphere of good taste which must make a lasting impression on all the students.

Enrolment.

Enrolment and range of ages in the different classes :—

Percentage of each class promoted last year.

II Class	86.6 p.c.	(plus 2 on probation)
III Class	94.4 „	
IV Class	100 „	
V Class	76.47 „	(plus 2 on probation)
VI Class	68.4 „	
VII Class	64.28 „	(plus 4 on probation)
VIII Class	100 „	
IX Class	50 „	(plus 2 on probation)

We are inclined to think that the number of promotions is too high in some classes. In many of the best Indian High Schools it does not rise above 75%. The system of promotion on probation is, as a rule, unsatisfactory. It should be possible, after full consideration of the pupil's work throughout the year, to come to a definite conclusion as to his fitness for a higher class.

School Section:

Daily Routine.

On whole school days the daily time table, the hours of which vary according to the season of the year, is as follows :—

Morning Parade	$\frac{1}{2}$ hour.
Bath and Sandhya	$\frac{3}{4}$ hour.
Morning preparation	$\frac{1}{2}$ hour.
Breakfast	9-15—9-45 A. M.
Classes (40 Minutes periods)	10-0—11-20 A. M.
Break	11-20—11-35 A. M.
Classes	11-35 A. M.—12-55 P. M.
Lunch Interval	12-55—1-55 P. M.
Classes	1-55—3-55 P. M. (Diploma to IV inclusive)
Class V	1-55—3-15 P. M.
Class VI A and B	1-55—3-15 P. M. (on Mondays only). 1-55—2-35 P. M. (on Tuesdays, Thursdays & Fridays).

Class VII A and B	{ 1-55—2-35 P. M. (on Mondays only). No afternoon classes on other days.
Class VIII A and B	{ 1-55—2-35 P. M. (on Tuesdays only). No afternoon classes on other days.
Rest, Juniors	1 hour.
Afternoon Preparation (Juniors only) 1 hour.			
Temple	$\frac{1}{4}$ hour.
Evening Games	1 hour.
Bath and dinner	1 hour
Evening Preparation (Senior			
Classes I to IV only)	...		1 to $1\frac{1}{4}$ hours.

Saturdays and alternate Wednesdays are half holidays. On alternate Wednesdays, fortnightly examinations are held in the afternoon.

On half-holidays, except in the hot weather, cricket is played after lunch.

Bed ... 8-30 P. M. for Juniors. 9-30—10-0 P. M. for Seniors.
Seniors can obtain special leave to sit up late to work.

On Sundays and holidays, games are voluntary but boys must be out in the open air in the morning and evening; also on Thursday afternoon, games are voluntary but boys have to be out in the open. On Sundays and holidays, there is a Temple service for 1 hour at 9-45 and Social Intercourse periods in the main building—Seniors } 1 hour
Juniors } each.

There is no preparation on Saturday evenings and on evenings before holidays and entertainments are arranged on those evenings in the College. Boys not detained for bad work or conduct are allowed to go to the Cinema in the City.

Library.

The number of books taken out from the library (including those by the staff) was :—

1934-35	...	932
1935-36	...	1,720
1936-37	...	1,438 (up to 15th of February 1937).

The figure should be nearly 2,000 by the end of this school year. (The above figures do not include books issued from the various class libraries). It is gratifying to note that more books are being taken out. The boys, however, in the diploma class seem to read practically nothing excepting their text-books. The librarian has introduced a form of notebook in which boys are supposed to write short analyses of the books they have read. This is an excellent idea but should be carried to its logical conclusion, *i.e.* these criticisms

should be seen not only by the librarian but also by the masters teaching English and Vernacular. Attention is being paid to getting a good supply of books in Vernacular. These as well as those on various kinds of sports seem to be particularly popular. More children's books are also being added. There is a considerable number of books in the library which are never taken out by anybody. One hesitates, however, to suggest that they should be eliminated, as many of them are standard works.

A good start has been made with the Masters' library but no issue register is maintained. We were glad to learn that the Librarian had undergone a course of training.

There are 25 members on the staff excluding the staff of the college department but including 5 honorary members. The increase in enrolment has necessitated the addition of two extra masters. Three members of the staff have been trained and one is undergoing training. Most of those who have not been trained have, however, good academical qualifications and experience.

Staff,

The school consists of eight classes, the lowest three being each divided into two sections, which form for all practical purposes, separate classes. The bifurcation has been made so that these classes will not be too large and also to provide for the weaker boys. The B section is the lower of the two. A boy entering the school in the lowest class should ordinarily complete the course in eight or nine years. The work in the upper classes is in accordance with the requirements for the Diploma Examination. The subjects for which the boys are prepared for this examination are:—

Organisation.

English, which includes a paper in General Knowledge, Arithmetic, History, Geography, Science or a Classical Language, Advanced Mathematics or Law Administration and a Vernacular.

Drawing is included in the scheme of studies up to class V, while one period a week is provided in the time table for classes up to class III for Special Activities as follows:—

III Class	...	Miniature Range, Fretwork, Scientific Experiments.
IV Class	...	Miniature Range, Carpentry, Motoring.
V Class	...	First Aid.
VI A & B	...	Fretwork, Carpentry, Gardening, Cycle Repairs.
VII A & B	...	Fretwork, Carpentry, Gardening, Cycle Repairs.
VIII A & B	...	Fretwork, Gardening.

As another car has just been presented to the College, it might be possible to continue the study of motoring in Class III as well.

We consider that very useful work is being done in these periods, but we feel that the value of the training would be enhanced if more guidance and incidental instruction could be given. The boys in the carpentry class should, for instance, know the names of the tools and the wood they use.

Much has been done to carry out the suggestions made at the inspection two years ago, especially useful being the Progress Report books and Meetings of the staff. The periods have also been changed as suggested from six at 45 minutes to seven at 40 minutes. It will be a good thing if masters in charge of subjects could arrange to exchange class with other masters taking the subjects throughout the school. They would thus be better able to co-ordinate what is being done in the various classes. As regards the actual teaching, it was on the whole of a very fair standard but we notice in some classes a tendency to lecture rather than to teach, and throughout the school too little use is being made of the blackboard. The duller boys should always be placed in front.

An adequate Preparation Scheme has been drawn up, the maximum time allotted being 2 hours in the higher classes and $1\frac{1}{2}$ hours in the lower.

There is some improvement in the coaching of English but the new syllabus requires still further amplification and the way in which this can profitably be done has been discussed with the various masters teaching the subject. The Principal, by means of the progress report books, will be able to see that the work is being properly carried out. What is particularly wanted is regular drill in such matters as common errors, conditional sentences and the like. In some classes we were inclined to think that too much time has to be spent on boys who were not really fit for the class they were in. In the upper classes a phrase book, written by one of the staff, was being used but this should be done with the greatest care. Where there is so much ground to cover, it is doubtful whether the time spent on going straight through this book is worth while. At this stage what the pupils meet within their text books should be sufficient. We are not sure that it is necessary, especially in the higher classes, to spend so much time in dictation. The value of this exercise is not primarily a test of spelling but it is "a test of the pupil's progress in hearing the spoken language". Spelling is better dealt with by some form of drill, special care being taken to group together similar and contrasted words. Before giving a dictation exercise it is advisable to let the boys study the difficult words beforehand so as to get a clear image of the words. We are glad to see that script writing has been introduced; this should, in time, bring about a distinct improvement in neatness and hand-writing. Meanwhile care should be taken to see that smaller boys are not using unsuitable nibs, as many are at present. Spoken English is good but in reading many boys read in a somewhat unnatural and stilted way. Special care should be taken to see that emphasis is rightly placed. In the lower classes during conversation answers should be in complete sentences and boys should be encouraged to question one another. Some good work has been done in the way of dramatization; we should like to see this extended to some of the upper classes. In the Diploma Class more precis and unseen work would undoubtedly lead to a better comprehension of the written word. Composition in some classes was weak; some of the exercises inspected were rather feeble in ideas. We think that not sufficient is being done in preparation for such written exercises. The drawing up of outlines by the co-operative efforts of the class should not be dropped too soon. Boys should make better preparation by searching in books to be suggested by the teacher, if necessary, for information on the subject on which they have to write. Many teachers have found the following books useful:—

"English Composition" by A. Turnbull (W. R. Chambers).

"Thought in English Prose" by A. J. Cole (Heinemann).

Work in Geography requires little comment as the teaching was good throughout. The boys were interested in what they were doing and could answer intelligently most of the questions put to them. Map work was adequate and as a rule confined to essentials but there was a tendency in some classes to spend too much time on this. Sketch maps only are wanted. The open-air map which has been again improved is an excellent feature and was well understood by the boys using it. We would suggest that the Memorandum on the Teaching Geography (George Philip & Son) should be purchased for teachers' use as it covers the whole ground in the most up-to-date way.

Instruction in Sanskrit was being carried out on somewhat old-fashioned lines but the boys had made good progress. More written composition work should be done and there should be regular drill in Grammar. The teaching in Vernacular showed a distinct improvement. More interesting subjects, might in the higher classes, be chosen for essay work.

Teaching in History was also on the right lines. In this subject constant revision is necessary; it is also desirable for the boys to know the most important dates. As we have remarked in connection with the Daly College, the English History course is far too long and there is nothing pedagogically unsound in beginning with Henry the VII or even later. As it is, there is far too much ground to be covered in the time available. If a new syllabus is to be prepared, it may be well to indicate in it in some detail those aspects of English History which will be subjects for examination. The possibility of giving more time for written exercises in History and Geography might be examined. Both subjects afford ample scope for narrative writing and logical reasoning. Their educational value is not fully utilised if these are neglected. Such exercises help to crystallise knowledge gained by oral instruction. It is also a help in training boys in written expression. The teachers of History and Geography will find the V. I. S. Film-slide Projector useful.

Nature Study used to be taught but it has now been left out of the scheme of work. Science is taken as an optional subject, alternative to Sanskrit or Persian, for the Diploma Examination. This means that a boy may leave the college without any knowledge of Science whatsoever, a subject which is now regarded as an integral part of the general education of boys. We suggest that the question of re-introducing Nature Study or rather a General Science course on broad humanistic lines should be considered. Such a course would also provide a foundation for the study of the specific sciences later. The boys had a fairly good grasp of the important points studied but their acquaintance with Science is too academic. We would like to see more attention being given to the study of the applications of scientific principles met with in every day life. The study of Chemistry is confined to the second and fourth years of the course. We think it would be an advantage if the study of both Physics and Chemistry could be taken up together in each year and the exercises in measurements of lengths and area etc., transferred to the Arithmetic lesson. The proposal to encourage boys to purchase scientific constructional outfits is an excellent one. Greater facilities might be provided for boys who obtain these outfits and others who wish to make models and

pieces of scientific apparatus by converting the spare room adjoining the Staff Common Room into a physics laboratory and work shop. This will be necessary if science work is introduced in the lower class as suggested above as the present laboratory will hardly be sufficient. The joy of completing something which works or functions is very great and the teacher will have no difficulty in maintaining the boys' interest in work of this kind. Electricity lends itself admirably to this sort of thing. The existing Laboratory will accommodate twelve boys comfortably though sixteen could, if necessary, work in the room. The equipment is sufficient for the present course and the numbers taking Science. Records of experiments had been neatly written up and suitably illustrated with line diagrams. They had been carefully corrected. A chart showing experiments and dates on which they have been performed by the boys is maintained. The school possesses a full size cinema projector which is of little use as suitable films are not available. It might be sold and a small portable up-to-date machine purchased.

The school, excluding the Diploma Class, is divided into ten sets for the purposes of Mathematics. The teaching of both Algebra and Geometry is started in Class V and continues as a compulsory subject up to Class III. Arithmetic is a weak subject. We feel that sufficient importance is not attached to this subject in the promotion examination. Oral work in mental calculations is done in each set but not, we think, perhaps sufficient. Good written work can only result from a good basis of mental automatism obtained by constant "mental drill." Some of the pupils seem to think that accuracy in calculation was quite a minor point if the "method" was right. It is necessary that every means should be employed to make mental calculation as accurate and as rapid as possible. An organized course of written tests against time, conducted regularly in each class throughout the year, might possibly effect an improvement. Speed in computation comes with practice and should be regarded as secondary to accuracy. Proportion seems to be taught throughout the course by Unitary Methods. It may be desirable to continue using this method for some time and the weakest pupils may perhaps keep to it but with the better pupils it should give place to "Fractional Method." Ability to use this method confers such advantages that time is well spent in acquiring this ability.

General Knowledge is well done throughout.

Provision is made for the teaching of Drawing up to Class V. We think the syllabus in this subject could with advantage be revised. The course as now prescribed is such as can be done in the first few months of the year. A detailed syllabus carefully thought out on definite principles and properly graded for each class is desirable. The course should as far as possible meet all three aspects of the subject, the expression of the representational and the cultural. The teacher rightly uses the blackboard to show how his pupils should proceed in a lesson on object drawing, but it is the process and not the result which is to be imitated. In drawing from nature models should not be used and the finished copy should be true in colour as far as possible as well as in form. We would like to see an attempt at appreciation being made by having the pupils' attention drawn from time to time to fine pictures and to

the beauties of nature around them. If possible, the best of the boys might be introduced to outdoor work.

The teacher may find some useful suggestions in the following books:—

“Teaching Creative Art in School” by R. & A. Eccott (Evan Bros.).

“Teachers’ Manual of Drawing” by Weston (Nelson.)

“Studies in the Appreciation of Art” by Rolls & Happenstail (Wheaton & Co.,) Teachers of English will find this book interesting.

Diploma Examination.

Results :

<i>Year</i>	<i>Presented</i>	<i>Passed</i>	<i>Failed</i>	<i>Subject in which failed.</i>
1934	8	4	4	1 in English, 2 in History and Geography, 3 in Arithmetic, 1 in Science.
1935	15	10	5	1 in Vernacular (Bengali), 5 in Arithmetic, 2 in Sanskrit.
1936	11	8	3	3 in English. 5 in Arithmetic. 1 in Ad. Mathematics.

The training which the College offers is conceived on broad and sensible lines with due attention to the many formative influences that can be brought to bear on the lives of the boys by a well developed and co-operate life. Every thing possible is done to stimulate healthy interests and the tone and discipline of the College are in consequence most satisfactory.

Principal, Government Training College,
Allahabad.

**Report by Lt.-Col. G. L. Betham, C.I.E., M.C., Resident in Mewar and
Political Agent, Southern Rajputana States.**

I was associated with Mr. F. K. Clark and Mr. W. G. P. Wall in their inspection of Mayo College on February 25th, 26th, and 27th, 1937. Throughout the inspection our ways lay mostly apart for whereas their's was an inspection of the teaching and organisation mine was of a less technical nature. My work was much facilitated by my personal knowledge of the members of the staff and of many of the boys during the last four years, and by statistical and other information given me by Mr. V. A. S. Stow, C.I.E., M.A., Principal.

Before breakfast on February 25th I went round the grounds where I saw some of the boys occupied at nets, at tennis and running. I understand that this is varied with riding and foot drill which occupy most of the boys. Specially selected boys are given coaching at games in the morning.

After breakfast I looked in at the library which is an attractive and nicely arranged room well equipped with reference books and educational as well as other literature. I then went over Ajmer House and the New Wing of Jodhpur House which was in process of being built at the time of inspection in 1936 but has since been completed. It provides accommodation for 10 boys. I then visited Jaipur House where a progressive scheme of extension is about to be taken in hand beginning with a new wing for 10 boys in the immediate future. On my way back to lunch I saw the swimming bath. Thanks to a generous donation from His Highness the Maharaja of Rajpipla it has been possible to increase and, at the same time, improve the swimming bath. It is now delightful. The College has taken over some land, which was previously leased out in plots to farmers, and it is now being used for a riding school and for new playing fields. The space previously used for the riding school has now been converted into a grass cricket ground and two football grounds. Two hockey fields and a grass cricket ground, with a stand, have been added to the playing fields which existed this time last year. Mayo College is now the proud possessor of no less than three grass cricket grounds.

Since the time of our inspection in 1936, when I was associated with Sir George Anderson the Educational Commissioner, a new Temple has been completed and consecrated. It has cost Rs. 26,000/- and is both attractive and imposing. Situated, as it is, near the main building of Mayo College it fulfills a much required want as the old temple, which was outside the grounds, was in many ways unsuitable. Many Ruling Princes generously assisted with handsome donations towards the equipment and consecration of the Temple but I must make special mention of His Highness the Maharaja of Kishengarh, who apart from giving the images and contributing handsomely in other respects, has taken a close and personal interest in all arrangements connected with the Temple.

His Highness the Maharana of Udaipur is kindly presenting ornaments for the Divinity.

His Highness the Maharaja of Panna put up money for the conversion of a stand, on the first hockey ground, into a pavilion.

Aided by donations from Their Highnesses the Maharana of Udaipur, Maharaja of Jodhpur, the Maharaj Rana of Dholpur, Maharawal of Dungarpur, Maharawat of Partabgarh and the Nawab of Tonk and subscriptions from members of the Staff and Old Boys of Mayo College, an existing building has been converted into a Club for members of the Staff and for Old Boys. The membership is now nearly 70. Under-graduates in the College Section and School Monitors may be admitted on invitation. The Club has two tennis courts, a bowling green, a badminton court, a reading room, a card room, a kitchen and a changing room. It also has a billiard room, with a table kindly presented by the Ruling Chief of Khairagarh of the Eastern States Agency who recently left the College. This Club, which at the instance of the Staff is named after Mr. Stow the popular Principal of the College, forms an excellent meeting ground for members of Staff as well as for the many Old Boys who are constantly visiting Ajmer.

On February 26th Lady Ogilvie and Major Hay inspected the gardens of the various houses of Mayo College. All were first class but the prize went to Udaipur House whose garden was a blaze of glorious colour. The roads, hedges, trees and lawns of the grounds are magnificently maintained. I have noticed that a considerably increased area of the roads has been tarred. This not only adds to the tidy appearance of the grounds but helps to keep down dust which makes the place more healthy.

The inadequacy of the Municipal water supply to the College is, I regret to say, as it was. Admittedly this year there has been general shortage of water over many parts of Rajputana and Ajmer is no exception. Nevertheless it is hoped that the Municipal Authorities will take up the question early. The College is doing what it can to keep the playing fields, and grounds generally green and have installed three electric pumps for one of which His Highness the Maharaja of Jodhpur has recently given a gift which will provide the College with a grass Polo ground; but nevertheless the supply remains inadequate.

On the third day of our inspection, namely February 27th, yet another generous gift appeared from His Highness of Jodhpur in the shape of a Morris motor car. On this the boys will be taught motor mechanism and driving.

I met and talked to, I should say, some seventy or eighty boys whom I met in the playing fields and various boarding houses. Their manners and appearance were excellent and they have the ease of manner and *savoir faire* essential to a gentleman. Many will never have to earn their living but will have to manage their States and Estates. For such Mayo College gives facilities for administrative training in co-operation with the local civil authorities. For the others who will have to earn their living an employment information bureau has been started and it is the endeavour of the authorities, through it, to interest boys early in life in various professions and then to give them specialised tuition fitting them for those professions. Only a very few appear to have any desire to go into the Indian Civil Service. I was not able to find that any boy wanted to become a doctor, veterinary surgeon, engineer or lawyer. Several appeared to me to want to join the Army and I cannot think of better material than the Mayo College boy for the Army, Indian Navy or Air Force. A few seemed to fancy the Railway but the majority are aiming for civil, military or police service in their own States.

During the year under report the College Section has been affiliated with the Agra University. Mayo College is therefore the only Princes College at present from which a degree can be obtained. This is likely to attract sons of Ruling Princes and Nobles from outside Rajputana.

In conclusion I would like to pay the same tribute as I paid last year to Mr. Stow and his staff for the magnificent condition of Mayo College and all that lie and they are doing for it.

G. L. BETHAM, LT.-COLONEL,
Resident in Mewar & Political Agent,
Southern Rajputana States.
